

设计说明

Design Introduction

在快节奏的社会下，当代大学生对于宿舍的深层需求已转化为在保障个人隐私的同时，渴望便捷、社交与归属感。因此本方案以“涌动”为核心概念，旨在构筑一个激发流动与相遇的垂直社区；在解决功能问题的同时，创造自然而然的交流触点，将日常琐事转化为社群黏合剂。打造一个能承载成长、激发互动、充满生命力的当代青年生活载体。

In today's fast-paced society, the deep-seated needs of contemporary university students for dormitory life have shifted toward a desire for convenience, social interaction, and a sense of belonging, while still ensuring personal privacy. In response, this scheme adopts "Flow" as its core concept, aiming to create a vertical community that encourages movement and serendipitous encounters. By addressing functional needs, it fosters natural points of interaction, transforming daily routines into agents of social bonding. The goal is to shape a living environment for modern youth—one that supports growth, stimulates engagement, and breathes with vitality.
